Less than 2 prior felony convictions	0		
2 or more prior felony convictions	2		
<b>Total Static Risk Score</b>		<b>Total Risk Score (Static + Dynamic Score)</b>	

\_\_\_\_ Low Risk = 0-6 points    \_\_\_\_ Moderate Risk = 7-12 points    \_\_\_\_ High Risk = 13+ points

The risk assessment is based on the static and dynamic factors that are applicable at the time of a parole hearing. A change in status following the hearing that may impact the risk factors shall not be the basis for an appeal for re-computation. A prisoner will only be granted a re-hearing if a factor is misapplied at the time of the hearing, and a correction changes the guideline recommendation.
