Re: Workshop Comments LCB File No. _____
on Geriatric Parole & New 233B.100 Form

Greetings

I did not receive the Notice of May 28 2020
hearings until Friday 22 in the evening

I ask you put my comments in the un-numbered
LCB-File.

A Comments on Geriatric Parole

1. Due to NDOC's culture and climate which
rejects the Anglo-American doctrine of lenity
it enforces a policy of not providing rules,
applications etc. of any other State of
Nevada Agency. This rule on Geriatric
Parole, section 1 paragraph 2 states the
application form will be available on
website or by contacting the Board in
writing. This conflict in law/rule asks
the impossible of any human person
because one cannot ask for an application
for a state benefit unless he knows a
benefit has come into existence. This conflict
of law between the state benefit and NDOC
Rule of obstruction of access to the notice

RECEIVED

JUN 01 2020

STATE OF NEVADA
PAROLE BOARD

and opportunity of the State of Nevada benefit -- thus violates the fundamental principle of "notice and opportunity" guaranteed by the U.S. Constitution.

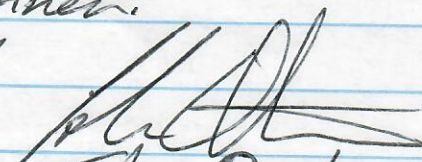

It should be noted that WDOC has been required to provide applications to the Pardon's Board, so there can be no logistical reason not to post at all prison housing units and law libraries notice of the new state benefit and make said form available at the Law Library and indexed in the list of available forms and at the Law Library Binder in each unit.

B. Comments on New Form for 233B.100

All the arguments in Comment A are incorporated and advanced here: make form available through WDOC law library indexed as a fundamental First Amendment right to redress grievances. Please.

I hope you will please notify me of the minutes approved on Thursday May 28 and send me notices of subsequent future hearings in a timely professional manner.

Respectfully submitted,

John Quintero
